Photometric Table

Values are based on a single aperture CR4WW-RF. Calculations will require placing the second head (IES file) 8" on center from the first placed IES file in the desired orientation. All Measurements are delivered or derived delivered lumens at 3000k. Ambient dim at full output. *C28 source requires active cooling and must be used with NIC housing for required airflow. All values can vary +/-10% from source manufacturer rated flux range.
