

The GrazeFall Family

The GrazeFall family of premier linear wall grazers includes this surface mounted lensed version. This high performance 2" (55mm) fixture is designed to highlight walls up to 15 feet high, featuring materials and revealing textures by contrasting light and shadow. The surface mounted housing can be mounted continuously and built to custom lengths in 6" increments with flush or regressed lens positions. The narrow profile fixture is ideal suited to highlight the texture in surfaces such as stucco or brick, illuminate flat surfaces such as venetian plaster, wood, or specular surfaces such as polished stone or stainless steel. The 2" GrazeFall family has additional product offerings, including surface mounted with baffles and an array of recessed options.

Key Points (GZ2L-SM)

- Trim**
- Regressed or flush lens options.
 - Shower Trim is fully sealed and gasketed.
- Source Optics**
- Up to 608 lm/ft available
 - 90+ CRI and 60+ R9
 - CCT offerings - 2700k, 3000k, 3500k and 4000k.
 - Dynamic tunable white in two ranges: 1800-4000k and 2700-6500k.
 - RGBW available with DMX control.
 - Veiling Acrylic lens standard - other lens types available
- Housing**
- 15 paint finish options + custom/RAL.
 - Inside and outside "L" configurations are available for corners and wrap arounds.
 - Damp listed - Wet listed with Shower Trim.
 - 6" specification increments (Integral Driver requires minimum of 2' and may influence 6" specification increment).
- Driver And Control**
- 1% dimming standard - 0.1% available
 - 0-10v, DALI, Lutron Ecosystem, EldoLED and DMX options available.
 - Flicker Free to IEEE 1789-2015
 - Universal 120v to 277v.

Ceiling Cutouts and Dimensions

To achieve best results, Specialty recommends to mount the fixture as close to the wall as possible. All drawings show closest possible mounting condition. Ceiling blocking is required and shown with a "X" in a box as a reference. Blocking will vary based on construction conditions and should be detailed on submittal drawings to define construction method and final wall offsets.

Photometric Table All data is based from goniometer measurements of production representative product. All lumen values are delivered or derived and can vary +/- 10% from LED manufacturer rated flux range. Measurements at 3000 CCT and Ambient Dim at full output. All photometry is used with a veiling acrylic (79A) lens other lens selections will modify the lumen output and exact beam spread. If photometry is required with a specific lens treatment contact your regional sales manager for a special measurement.
