

# The Rivet Family

In Rivet you will find a captivating, precision driven lighting instrument with a distinctly styled aperture trim. Tailored to quietly enhance architectural spaces, its unique precision milled aluminum trim is available in all of our anodized finishes, as well as field paintable. The housing's thoughtful engineering includes a magnetically attached head with a precision tilt aiming mechanism and a sliding captured lens for use in wet locations such as showers. Source options include our 90+ CRI static white LED sources and our proprietary Ambient Dim chip. This family is available in round or square apertures and in single or double configurations.

PROJECT:

SPECIFIER: DATE:

### Key Points (RV3MD-SA)

- Milled aluminum trims available in Flangeless or Flangeless Panel
- Three standard anodized finishes, clear, black and bronze, plus all of our custom anodized finishes.
- Trims are field paintable. We recommend specifying the Clear Anodize finish for trims that are to be field painted.
- Flangeless includes plaster flange with lip

### Source / Optics

- Unique magnetic mounting of luminaire head promotes easy, full 360° rotational aiming, and allows toolless drop down of head for easy access to change optics and lens accessories, as well as driver servicing
- Precision engineered dual axis cam for vertical tilt aiming up to 36° allows luminaire to remain centered in aperture reducing beam
- 3 beamspreads available 20°, 28° and 40°
- Up to 1073 delivered lumens per head
- <2 MacAdam Steps (<2SDCM) for fixed white
- 90 CRI, 60+ R9 Standard- 95 CRI 90+R9 Optional
- 2700, 3000, 3500, 4000K and Ambient Dim (3000-1900k)
- L87B3>55,000 hours at 40°C Ambient

### Housing

- Unique integral sliding lens within housing provides of us Listed –

  Dame activity in the control of the c Damp or wet with shower trim
- Heavy gauge aluminum for new construction
- IC Rated / Airtight Housing approved for use in direct contact with insulation - Chicago Plenum Available
- Suports California Title 24 part 6 compliance to JA8 requirements with airtight housing

- Phase, 0-10, DALI, or Ecosystem
- Flicker free to IEEE 1789-2015 available
- Prewired and integral to housing unless otherwise noted
- Universal 120-277v unless otherwise noted

Photometric Table All data below is based from goniometer measurement of production representative product. All lumen values can vary +/-10% from LED manufacturer rated nominal flux.

| SQUARE<br>Beamspreads |                        | 20°                      |                 |            |           | 28°                      |                 |            |           | 40°                      |                 |            |           |

2 Aperture Adjustable Recessed Accent/Downlight

# Photometric Table

Values are based on a single aperture RV3D-RA. Multiple heads will deliver more light and will need to be accounted for individually in calculations. Calculations will require placing the second head (file) 8" on center from the first placed IES file. All Measurements are delivered or derived delivered lumens based on 3000k. Ambient dim at full output. All values can very +/-10% from source manufacturer rated flux range.
