

The Rivet Family

In Rivet you will find a captivating, precision driven lighting instrument with a distinctly styled aperture trim. Tailored to quietly enhance architectural spaces, its unique precision milled aluminum trim is available in all of our anodized finishes, as well as field paintable. The housing's thoughtful engineering includes a magnetically attached head with a precision tilt aiming mechanism and a sliding captured lens for use in wet locations such as showers. Source options include our 90+ CRI static white LED sources and our proprietary Ambient Dim chip. This family is available in round or square apertures and in single or double configurations.

Ceiling Cutouts and Dimensions

Trim Types Indicated by Drawing

3" - 2 Head IC/Airtight Housing

Flangeless Trim (Z)

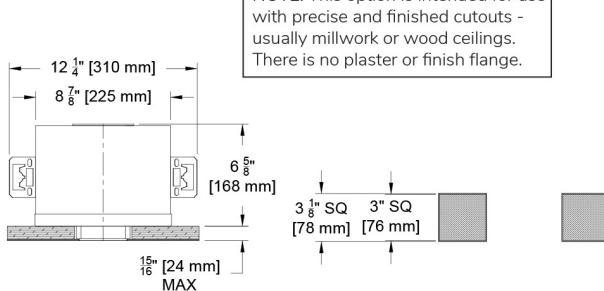

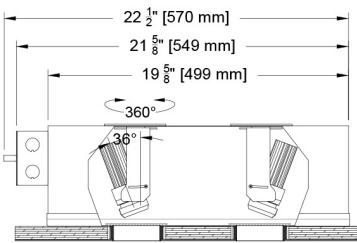

(RV3MD-SA-Z-AU)

3" - 2 Head IC/Airtight Housing

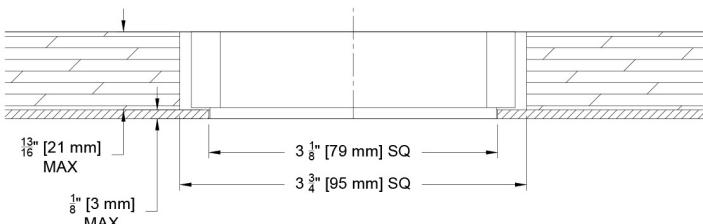

Panel Trim (P)

(RV3MD-SA-P-AU)

NOTE: This option is intended for use with precise and finished cutouts - usually millwork or wood ceilings. There is no plaster or finish flange.

Photometric Table

Values are based on a single aperture RV3D-RA. Multiple heads will deliver more light and will need to be accounted for individually in calculations. Calculations will require placing the second head (file) 8" on center from the first placed IES file. All Measurements are delivered or derived delivered lumens based on 3000k. Ambient dim at full output. All values can vary +/-10% from source manufacturer rated flux range.
