

The Slice Family

The Slice Combo pairs a diffuse general source with a punchy, directional downlight in a single fixture. As part of the Slice family, it is offered in linear 1" and 2" wide profiles in recessed, surface and pendant options. This 1" recessed fixture combines the Multicell and Lensed fixtures to allow an almost infinite number of design options. We have defined a series of standard offerings within this datasheet, but expect that you will want to modify the configurations for your project needs. Please take heed of the design criteria for minimum sizes. For more detail on the lens or multicell sections please refer to the datasheets (SL1DC-LFRC or SL1DC-MCFRC). The Slice Combo can be used to illuminate your space with precision.

Key Points (SL1DC-CBRC)

Source / Optics

- Lensed - Even illumination with wide (~100°) lambertian distribution.
- Lensed - Even illumination with wide (~100°) lambertian distribution.
- Multicell - Up to 1700 Lumens/foot
- 3 beam spreads - 15°, 30° and 45°
- 57/63+ lumens per watt/foot (multicell/lensed respectively).
- Multicell - Ultra low glare with UGR values <10.
- <3 MacAdam Steps (<3 SDCM).
- CCT offerings - 2700k, 3000k, 3500k and 4000k.
- 90+ CRI and 50+ R9
- **TITLE 24** Supports CA Title 24 part 6 compliance meeting JA8 requirements

Housing

- 14 available housing finishes+ custom/RAL available for flanged trims.
- Profile allows continuous runs to your desired length. thorough combinations of general illumination modules with multicell down lights using three building blocks: lensed downlights, multicell downlights and the optional made to length blank panels, for separation between modules and fillers to allow fabrication to exact lengths.
- Lengths longer than 8' are assembled in the field with engineered joiners
- Damp listed

Driver And Control

- Universal 120v to 277v.
- Remote driver mounting required.
- 0.1% dimming available in 0-10 or DALI-2 protocols.
- Flicker Free to IEEE 1789-2015 (low risk to no risk).
- Universal 120v to 277v.

Fixture Lengths and Design Criteria

Standard and Custom

Standard defined lengths and configurations are shown below. Using the basic building blocks of celled modules, lensed modules and blank panels, custom continuous runs are available using the following design criteria: minimum of two 5 cell modules at any location within a specified run; minimum 1ft length of lensed section at any location within a specified run; blank panels of any length greater than 1/2" permitted; and minimum overall length > 3ft.

SL1DC-CBRC - Standard Modular Configurations (5 cell runs)

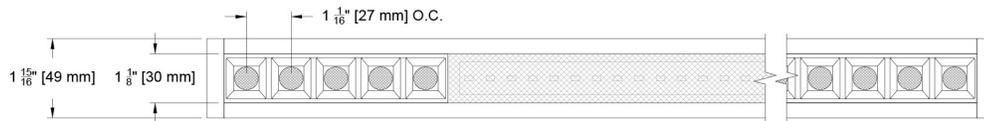

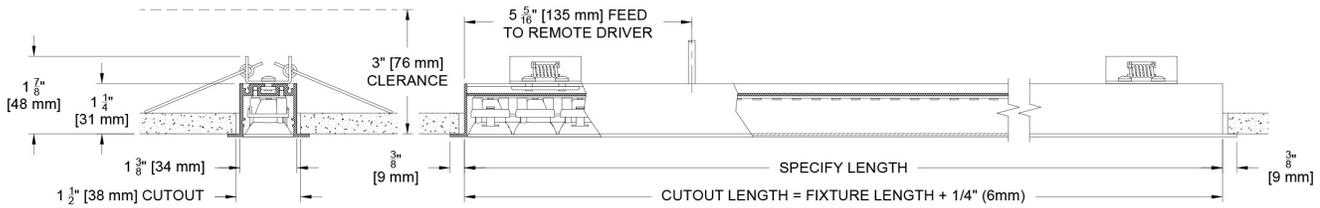

Ceiling Cutouts and Dimensions

Furnish layouts of any non-standard runs for the purpose of submittal drawings which require approval prior to fabrication.

SL1DC-CBRC - Recessed Flanged

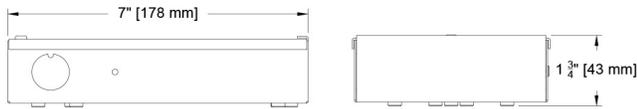

AF

(SL1DC-CBRC-AF)

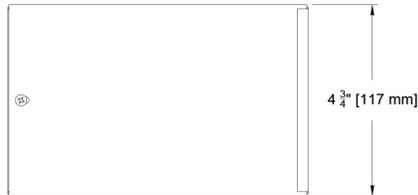

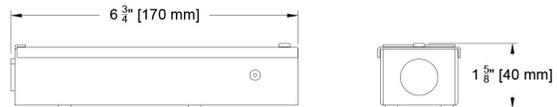

Remote Driver Enclosure

REMOTE MOUNTING REQUIRED

REMOTE MOUNTING REQUIRED

* Note: Small driver enclosures is for use with a pair of 5 cell multicell units. For quantities greater than two 5 cell multicell units, the larger enclosure is used. Larger enclosure is used for lensed sections.

Photometric Table

Values are delivered lumens based on a 5-cell module at 5.21" (5 1/4") (132.5mm) and extrapolated for per foot numbers or 1 foot of lensed section.
 CAUTION: IES FILES ARE FOR A 5 CELL MODULE. CALCULATIONS MUST PLACE THE 5 CELL MODULE FILE 5.21" (132.5mm) ON CENTER OR 1 FOOT LENSED SECTION AT THE APPROPRIATE LOCATION OF THE DEFINED CONFIGURATION. All data is based on goniometer measurements of production representative product. Measurements are taken at 3000 CCT with a black baffle and can vary +/- 10% from LED manufacturer rated flux range.
