

Welcome to the Specialty Lighting Wood Trim Guide

This document will explain a step-by-step process of how to order and procure wood trims for Specialty fixtures offering this finish option.

One of the most elegant and luxurious ceiling applications is with solid wood. This ceiling type is most often found in high end residences, hospitality and commercial office lobbies. Specialty has developed the equipment and process to allow our downlight trims to be seamlessly integrated into these applications.

Here is How it Works

SPECIFYING Wood trims are offered as a “D” ordering code within the Trim Finish or Trim Bezel columns depending on the fixture. Please note, because the trims are machined, we can only work with Hardwoods. All wood trims are set for a flangeless (ordering code Z) installation. Flanged wood trims are offered as a custom order, but this application is rare since most projects desire the ceiling plane to blend with fixture trim.

The “Panel Mount” (PM) mounting option will also need to be selected in the “Mounting” column. Dimensional details are provided on the cut sheet drawings and will be further defined in the submittal drawings and installation instructions.

PROCURING Because wood grains vary from batch to batch, we require wood from the ceiling stock to be sent to our factory. Do not send any soft woods or stock with knots or cracks. They will not mill correctly. We will not accept any endangered species – it is simply not the right thing to do. The stock needs to be cut to our defined dimensions for each trim on the project. This guarantees the wood will have the best match possible to the rest of the ceiling. Once we receive the stock, Specialty will mill the wood to make a trim which inserts into the fixtures.

FINISHING We will send the trim to the job site unfinished. This will allow the contractor to finish the wood with the same stain and varnish as the rest of the ceiling.

F Flanged Trim	NP New Pan for Mounting to bottom of wood studs	B Black Anodize
Z Flangeless Trim	BP Bracket Pan for mounting with hanger bars to studs or T-bar	L Clear Aluminum Anodize
	AT ●● Airtight Housing*	H Champagne Anodize
	PM Panel Mount	G Gold Anodize
	RM Remodel mounts direct to ceiling - Wing Springs	D Wood

Partial Ordering Code for wood requires selections highlighted in red circles

*wood must be used with Flangeless (Z) trim option code
** Refer to Specialty Finish Guide for color codes and details
